

State of Ohio Generative Artificial Intelligence (AI) Solutions Central Repository

As defined in Ohio Administrative Policy IT-17, "Use of AI in State of Ohio Solutions," state entities pursuing Generative AI solutions must align with the following requirements:

1. Obtain approval from the agency executive leadership for the use case and the data usage within the solution.
2. The use case must be submitted by the agency's chief legal counsel to the AI Council for review via the AICouncil@das.ohio.gov email address. Prior to submission, the agency shall ensure that the information required by this template is completed to the fullest extent possible.
3. Receive approval from the AI Council on proposed use cases prior to developing a pilot.

* Refer to [Ohio Administrative Policy IT-13, "Data Classification,"](#) for additional information. If approved by the AI Council, this information will be incorporated into the central repository for Generative AI use cases.

NOTE: If you have multiple projects, please submit a separate document for each project.

Solution / Project Name	
Agency	
Vendor (if applicable)	
Purpose	
Intended Benefits	

AI Category (Generative AI, Biometric Identification, Deep Learning, Intelligent Automation, Machine Learning, Natural Language Processing, Predictive Analytics)	
Data Input	
Data Output	
Data Classification* (Low, Moderate, High)	
Data Storage Location (IOP Data Analytics Platform, Local Machine, State of Ohio Cloud Environment, Vendor hosted)	
Security Review	
Test Results Validated?	

Proposed Generative AI Use Case - Supporting Information

Instructions: Please complete the questions below to provide additional information regarding your agency's proposed Generative AI use case. This information will assist the AI Council in their review and determination process.

Approvals (select all that apply):

Agency Executive Leadership

Agency Data Governance Team

Generative AI Solution Scope (select all that apply):

Internal Use

Interface with Public

Description of the Proposed Generative AI Use Case:

Generative AI Solution Design and Software Tool(s):

Provide a high-level description of the solution design. Please identify the software tool(s) involved if not already detailed in the GenAI Central Repository tab.

Type of Datasets Involved in Use Case (select all that apply):

Agency-owned datasets

Cross-agency datasets

Public datasets

Security and Privacy Governance:

In accordance with [IT-17, "Use of Artificial Intelligence in State of Ohio Solutions,"](#) the agency completed the following steps before submitting the proposed Generative AI use case for consideration:

Conducted a Risk Assessment

Created a Privacy Impact Statement, as required by ORC 125.18(C)(2) and ORC 1347.15(B)(8)(Resources are available on the DAS OIT Office of Information Security and [Privacy](#) web page)

Reviewed any proposed AI software to ensure it meets all necessary security and privacy requirements

Conducted a Security Review

(Please provide additional details in the GenAI Central Repository tab.)

High-Level Timeline/Next Steps:

Please provide a high-level description of the project timeline, development process (e.g., pilot, outsource versus in-house development), and the next steps, including the approach to procurement.

Submission Instructions: Please have the agency chief legal counsel submit the approved Generative AI use case and any supporting materials to: AICouncil@das.ohio.gov.
